## **Esperion Therapeutics to Host Inaugural Analyst and Investor Day**

ANN ARBOR, Mich.--(BUSINESS WIRE)-- Esperion Therapeutics, Inc. (Nasdaq: ESPR), a clinical-stage biopharmaceutical company focused on developing and commercializing first-in-class, oral, low-density lipoprotein cholesterol (LDL-C) lowering therapies for the treatment of hypercholesterolemia, today announced that it will host its inaugural analyst and investor day event and webcast for institutional investors and research analysts on Tuesday, July 29 at 8:30 a.m. Eastern Time.

The event can be accessed by dialing (877) 831-3840 (domestic) or (253) 237-1184 (international) five minutes prior to the start of the event and providing access code 76041931. A live, listen-only webcast of the event can be accessed on the investor relations section of the Esperion website at [www.esperion.com](http://www.esperion.com). A webcast replay will be available approximately two hours after completion of the event and will be archived on the Company's website.

### **Esperion's Commitment to Cardiometabolic Disease**

Esperion is committed to improving the lives of patients with cardiometabolic diseases. The Esperion team leverages its understanding of and experience with key biological pathways to discover or license and develop innovative therapies for the treatment of patients with unmet needs, especially those patients with hypercholesterolemia who have uncontrolled cholesterol levels despite the use of currently available therapies. Esperion has assembled a portfolio of programs including one product candidate in late-stage clinical evaluation and two pre-clinical product candidates.

### **About Esperion Therapeutics**

Esperion Therapeutics, Inc. is a clinical stage biopharmaceutical company focused on developing and commercializing first-in-class, oral, LDL-cholesterol lowering therapies for the treatment of patients with hypercholesterolemia and other cardiometabolic risk markers. ETC-1002, Esperion's lead product candidate, is a unique, first-in-class, orally available, once-daily small molecule designed to lower LDL-cholesterol levels and avoid the side effects associated with therapies currently available for lowering LDL-cholesterol. ETC-1002 is being developed primarily for patients intolerant to statins and with elevated levels of LDL-cholesterol. Phase 2b clinical trials for ETC-1002 are currently underway and build upon the successful and comprehensive Phase 1 and Phase 2a programs.
